The nice one. First blend with Tinta Negra mole , verdelho and malvasia. The Tinta negra has a good acidity and bring sturcture in the wine. Malvasia gives fruit and youth to wine. Verdelho always brings elegance to every madeira. There?s a small quantity of +60 y old tinta negra in the blend to give an extra touch of complexity.

Rijping The MC 1234 is a project created by the madeira collection to lower the entrylevel on madeira wines by giving the wines less oxidation. We try to do that to blend young wines +/- 10 y old of different grape varietals with lots of fruit and good freshness. The project goal is to bring a different style from what exist in the general offer of Madeirawines.
